TOUCH BAR VARIATIONS
ELECTRIC LATCH RETRACTION - ELR

Exidor Touch Bars can be supplied with 24vDC motors for Electric Latch Retraction. Rather than using a solenoid, the use of motor reduces power usage. ELR allows the user to operate the touch bar using access control hardware, such as swipe card system, keypads, Fire Alarm or Security signals.

Check with our sales office for options and prices.

The full range of Touch Bars allows many more options to be specified for your project;

Finishes - Silver, Stainless Steel, Brass and Powder Coated Finishes
Door Sizes - Extended models and bars to suit doors up to 1200mm wide
Double Door Accessories and Strikes - A full range of accessories are available to fit the touch bars to a range of door / frame types.

500 Series Slim Line Panic Bars

The Exidor 500 Series panic and emergency is a modern and stylish range of slim line hardware with products suitable for timber, aluminium and UPVC doors. Available with Pullman Catches in single, two and three point locking.

Accessories to add to Panic Bolts to enhance features

- 299 Dogging Device for 200 & 300 Series Bolts Silver
- 304 Exit Alarm
- 314 Vertical Pullman Latch Kit
- 315 Horizontal Pull Latch Kit
- P0803 2.1m Top Shoot Rod for Doors up to 3.18m
- P1001 Oval Push Bar 1180mm Silver

299 Dogging Device.
For use with the Exidor panic bolt and pullman latch ranges, the dogging device is available as an accessory. The dogging device allows the bolts to be withheld in the retracted position ensuring the automatic top trip catch, or pullman latch, do not engage when the door is closed.

314 Pullman Catch.
The Exidor pullman latch kits can be supplied for any of the Exidor 200 series bolt range. They provide a smooth and quiet alternative, as well as offering increased security to the traditional top trip catch.

Outside Access Devices for 200 and 300 Series

- 298 Knob Operated Access Device (Fixed Cylinder)
- 302EC Knob Operated Access Device with Removable Euro Cylinder
- 322EC Lever Operated Access Device with Removable Euro Cylinder
- CL500PK Digital Door Lock to Suit 200/300 Series Panic Hardware
- CL600PK Heavy Duty with Easy Code Change Digital Door Lock for 200/300 Series
